

Installing Digital Television

MATV and IRS

System Planning

We offer a free system planning service to all our customers. All we require is as much information as possible about the system and we'll get back to you with a layout and prices as soon as possible.

To help, these are the essential things we need to know:

System type - TV, TV+Radio, TV, Radio and Satellite

Layout - Number of floors, number of points. Additional room requirements

Location of Aerials/Dish and Distance from Amplifiers - location of mains power points

Additional Requirements – cable lengths to dwellings

Just call or email your requirements to Stu or Gary at sales@eurosatmidlands.com
